EDUCATION

Bachelor of Science in Computer Science | Nagindas Khandwala College, Mumbai University | **2022-2025**

PROFESSIONAL EXPERIENCE

- **Apprentice** at Jones Lang LaSalle, Mumbai **Apr 2026 - Present**

  Built a **Python** pipeline to process bulk utility bills using **text extraction** parsing consumer number, billing month/year, and auto-classifying documents into a structured directory taxonomy eliminating manual sorting for 250 bills/month.

  Analysed Helix facility data using pivot reports to track building-wise tickets, inspections, PPMs, and operational KPIs.

- **AI Intern** at Gray Matrix Solutions, Mumbai **Oct 2025 – Jan 2026**

  Semantically clustered **50K** banking chatbot queries into groups; selected top **15 clusters** (5 questions each) and used **GPT** to rewrite them into standardized FAQ format.

  Reduced **API** calls per query from 2 to 1 in a RAG document chatbot (merged response citations and recommendations), across Claude/GPT and direct/streaming modes cutting latency and cost.

- **AI Intern** at Mettler-Toledo GBSI, Mumbai **Jan 2025 - Oct 2025**

  Developed **CrewAI**-based multi-agent tools to analyze sales CSV datasets of **10k–50k** rows, automatically surfacing the top 3 positive and negative performance categories using business-defined logic.

  Generated structured **JSON** outputs consumed by downstream LLM commentary pipelines, enabling automated executive-level insights that previously required manual analyst review

PROJECTS

- **FIFA 2026 Match Predictor** | Tech: **Python, scikit-learn, XGBoost, MLflow** GitHub

  Trained and compared 4 ML models (Logistic Regression, Random Forest, XGBoost, Gradient Boosting) on 49,000+ historical matches, achieving **57.8%** test-set accuracy; backtested the model on 103 real World Cup 2026 matches for validation, reaching **63.1%** accuracy. Correctly predicted Spain to win in 2026 final.

- **APO** - Agentic Prompt Optimizer | Tech: **Python, AgentScope, FastAPI** Github |Demo

  Built a multi-agent system where Architect, Critic, and Red Teamer agents iteratively refine and adversarially harden LLM system prompts through scored feedback loops.

  Developed a FastAPI backend streaming real-time agent updates to a frontend with a live stage tracker and score chart, deployed on Render

- **Mockmate** – Voice based mock interview | Tech**: Python**, **Langchain**, FastAPI Github

  Built an interview simulator using Whisper and TTS, powered by a three-agent **LangGraph** pipeline (interviewer, evaluator, feedback synthesizer).

  Integrated **ChromaDB** vector search to retrieve resume content and conversation history for personalized, context-aware questioning

SKILLS

Languages/DB: Python, SQL, MongoDB

ML/GenAI: Machine Learning, Generative AI, PyTorch, Prompt Engineering

LLM Frameworks: LangChain, CrewAI, AgentScope, FAISS, Sentence Transformers

Backend: FastAPI, REST APIs | **Frontend:** HTML, CSS, JS

Tools: Docker, Git, AWS, Excel | **Data**: Preprocessing, Visualization

CERTIFICATIONS

- Multi AI Agent Systems with CrewAI – DeepLearning.AI
- Machine Learning Specialization – Stanford University (Coursera
- Python Pro Bootcamp – Udemy
- Azure Data Fundamentals – DP 900 - Microsoft
